github.com/akashp2002

Summary

MCA graduate specializing in Generative AI and Agentic AI, with hands-on experience building production-ready AI systems using LangGraph, RAG, Model Context Protocol (MCP), LLMs, and FastAPI. Experienced in designing multi-agent workflows, stateful AI applications, and intelligent retrieval pipelines with persistent checkpointing. Strong foundation in Java and full-stack development, with a passion for building scalable, real-world AI applications.

Education

Tkm College of Engineering Master of Computer Application	2024 – 2026
Morazha Co-Operative Arts and Science College Bachelor of Computer Application	2019 – 2022

Projects

Cloudflare Incident RAG System	https://github.com/akashp2002/CloudflareAssistant
- Built a full-stack RAG system (FastAPI, React, LlamaIndex, Qdrant, Groq, Docker) to answer questions from Cloudflare incident postmortems. - Implemented hybrid retrieval combining dense vector search and BM25 via Reciprocal Rank Fusion, followed by cross-encoder reranking for improved relevance. - Built grounded answer generation with source citations and explicit refusal on insufficient context, and evaluated retrieval quality using Ragas.	
Multi-Agent AI Job Matching Platform	https://github.com/akashp2002/careerpilot ai
- Built a multi-agent job matching system in LangGraph — five specialized agents handle job retrieval (MCP), JD analysis, semantic matching, ranking, and explanation generation, with human-in-the-loop refinement. - Engineered an LLM resume-parsing pipeline (Groq/Llama, FastAPI, PostgreSQL) that extracts structured candidate data and validates it against source text to catch hallucinations. - Implemented semantic matching using sentence embeddings and weighted skill/experience/location scoring for ranked job recommendations.	

Skills

Frontend: React js, HTML, CSS

BackEnd: Node js, Express js, FastAPI, REST APIs

Programming Languages: Java, Python, SQL

Database: MongoDB, MySQL, Qdrant (Vector DB)

AI/GenAI: RAG Pipelines, LlamaIndex, LangGraph, MCP, Groq API, Prompt Engineering, Transformers

Tools: Docker, Git, LangSmith, Ragas

Certificates

Data Structures and Algorithms Design – NPTEL–IIT Kanpur	2025
MERN Stack Development	2022–2023
Deep Learning – DeepLearning.AI (Coursera)	2026
